

UDOH RUBEN EKEREETE

Lagos, Nigeria | +234 803 353 3185 | udohruben@gmail.com | github.com/devRubey | portfolio-devrubey.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building microservices architectures, REST APIs, and full-stack web applications. Proficient in Java, Spring Boot, and modern web technologies, with a strong focus on secure inter-service communication and database management. Experienced in implementing JWT authentication, Spring Cloud Gateway, and PostgreSQL to deliver production-grade software solutions. Dedicated to solving complex real-world problems through clean, well-structured code and efficient system design.

TECHNICAL SKILLS

Languages: Java (Core, OOP, Multi-threading), JavaScript (ES6+), HTML5, CSS3, SQL
Frameworks & Tools: Spring Boot, Spring Cloud Gateway, React, React Native, JavaFX
Backend & API: Microservices Architecture, REST APIs, JWT Authentication, Maven
Databases & Testing: PostgreSQL, MongoDB, JUnit 5 (Unit Testing)
DevOps & Tools: Git, GitHub, Postman, IntelliJ IDEA, Responsive Web Design

TECHNICAL EXPERIENCE

Microservices Backend Developer | E-Commerce System

- Engineered a production-style microservices architecture featuring four independent services: product, user, order, and API gateway.
- Implemented secure registration and login workflows using JWT authentication.
- Established real-time inter-service REST communication via Spring Cloud Gateway to verify stock availability during order confirmation.
- Managed isolated PostgreSQL databases for each service to ensure data integrity and service independence.

Data Manager | Airline Reservation System

- Architected a high-concurrency flight booking and ticket management simulation using Core Java and JDBC.
- Developed a real-time seat management engine to prevent double-booking and handle complex cancellation/refund logic.
- Built a custom desktop interface using JavaFX and Scene Builder to manage mock payment processing.

Backend Developer | Book Library API

- Developed a RESTful API supporting full CRUD operations, pagination, and request validation for library workflows.
- Achieved high code reliability by writing comprehensive JUnit 5 test suites covering duplicate ISBN detection and borrow/return logic.

PROJECTS

Full Stack Task Manager | github.com/devRubey/FullStackTaskTracker

- Full-stack task management app with React and Spring Boot; REST APIs for task creation, updates, and deletion.

Unmasked | github.com/devRubey/Unmasked

- Full-stack chess analysis and coaching platform with React and Spring Boot; Stockfish (UCI) engine integration with a bot opponent across 9 adjustable difficulty levels; JWT-secured REST API and PostgreSQL persistence.

EDUCATION

MMS - Software Engineering | NIIT Nigeria

Lagos, Nigeria | January 2025 - December 2026 (Expected)

Relevant Coursework: Java Programming, Microservices with Spring Boot, MongoDB, React & React Native, Software Testing with JUnit 5, Microservices with Kubernetes & Containerization, Continuous Delivery with Docker and Jenkins.

West African Senior School Certificate (WASSCE) | Great Platinum College

Lagos, Nigeria | June 2024

LEADERSHIP & ACHIEVEMENTS

- Group Leader, Snowman House Database Project — Led a team of 11 members in designing and implementing a MongoDB database system.
- Chess Instructor / Coach — Provide strategic guidance and instruction to beginner and intermediate players.
- 1st Place, School Chess Competition — Great Platinum College.

CERTIFICATIONS

- 12 professional certifications in business communication, digital business skills, cybersecurity awareness, and AI fundamentals — HP LIFE / HP Foundation and La Plage Meta Verse (2026).
